Computer Engineering Graduate | MSc in Artificial Intelligence | Software & AI Projects Eligible to work in the UK (Graduate Visa until Jan 2028)

PROFESSIONAL SUMMARY Computer Engineering graduate currently completing an MSc in Artificial Intelligence at Oxford Brookes University.
I have hands-on experience in both software engineering and AI, including backend development, databases, computer vision, and machine learning.
I've worked in academic and industry environments, contributing to real-world projects in consulting, research, and autonomous systems.
Open to graduate roles in software or AI, with eligibility to work in the UK under the Graduate Route visa until Sept 2027 (no sponsorship needed).

EDUCATION

Oxford Brookes University, Oxford, UK
MSc in Artificial Intelligence

Sept 2024 – Sept 2025

- Core modules: Machine Learning, Deep Learning, Robotics, SLAM, Computer Vision, Neural Networks, LLMs.
- Member of Oxford Brookes Racing Autonomous Team — contributed to Control and Perception algorithms.
- Dissertation: Small object detection in amateur tennis using YOLOv8 and tracking systems.

University of Seville, Seville, Spain
BSc in Computer Engineering

Sept 2019 – Jun 2024

- Final project: Voice-based virtual assistant for restaurants using NLP and LLMs.
- Skills: Full-stack development, database design, and ML pipelines.

WORK EXPERIENCE

Intern Software Engineer, Sopra Steria, Spain

Sep 2023 – Mar 2024 Global IT consultancy providing software solutions and services to international clients across various industries.

- Part of the internal team, where I worked on streamlining internal processes through batch processing and automation.
- Worked with a French insurance company to enhance their IT system by adding new backend features and optimizing existing processes.
- Collaborated in a bilingual (Spanish/French) team, taking part in daily stand-ups and sprint meetings using agile methods.

SELECTED PROJECTS

Virtual Assistant for Restaurants (BSc Final Project)

Technologies: Langchain, RAG, Flutter, NLP, Vector DB

Created a mobile voice assistant using LLMs and Retrieval-Augmented Generation to process restaurant orders, enhancing automation and user experience.

Tennis Ball & Player Tracking System (MSc Dissertation)

Technologies: YOLOv8, DeepSORT, OpenCV

Developed a real-time vision system to detect and track tennis balls and players in amateur match videos with over 85% accuracy using custom datasets.

Customer Segmentation with Unsupervised Learning (Personal Project)

Technologies: Python, Scikit-learn, Pandas, Matplotlib, Seaborn

Segmented e-commerce users via KMeans and DBSCAN, applying PCA to identify behavior clusters and inform marketing strategies.

Pet Adoption Web Scraper (Personal Project)

Technologies: Python, Flask, BeautifulSoup, PostgreSQL

Built a unified portal by scraping and integrating pet adoption data from 20+ Spanish animal shelters.

SKILLS & INTERESTS

Languages: English (B2), French (C1), Spanish (C1), Arabic (B1)

Technical Skills:

- **Programming Languages:** Python, C++, Java, JavaScript, SQL, Dart, PHP
- **AI & Machine Learning:** PyTorch, TensorFlow, Keras, Scikit-learn, NumPy, Deep Learning, Transfer Learning, CNNs, RNNs, LLMs, Langchain, RAG (Retrieval-Augmented Generation), Web Scraping (BeautifulSoup, Selenium), Model Evaluation
- **Databases:** MySQL, PostgreSQL, MongoDB, SQLite, Firebase
- **Web Development:** ReactJS, HTML, CSS, Bootstrap, Django, Flask
- **Mobile Development:** Flutter
- **Frameworks & Tools:** Spring Boot, Spring Security, Angular, Git, Docker
- **Version Control:** Git, GitHub, GitLab
- **Data Science & Visualisation:** Pandas, NumPy, Matplotlib, Power BI
- **Operating Systems:** Windows, Linux

Interests: Sports, Web Development, Technology, Travel
